

410 Training Material

Lippert ABS System Features & Benefits

This training material provides an overview of the Lippert ABS system, highlighting towing safety advantages, braking performance, trailer compatibility, and installation benefits. It is intended to help team members and dealers confidently explain the system's value to customers.

Why It Matters

- The Lippert ABS system is designed to improve trailer control, increase driver confidence, and enhance stopping performance in a variety of road conditions.

Key Safety & Performance Features

- Promotes safer towing and improved driver confidence
- Helps maintain better control on slippery roads
- Assists during sudden or emergency braking situations
- Integrates with trailer brakes to help prevent wheel lock-up
- Dynamic Brake Boost temporarily increases brake torque for added stopping power

Smart Installation Benefits

- Autoconfiguration learns tire size, track width, number of axles, and orientation
- Simplifies OEM installation and setup

App Connectivity

- Compatible with OneControl App and Compass Connect
- Digital odometer
- System monitoring and trailer information tools

Broad Compatibility

- Supports 2–6 wheels
- Supports 1–3 axles
- Designed for electromagnetic drum brakes
- Requires 7-way wiring connector

Controller Friendly

- Compatible with OEM brake controllers
- Compatible with aftermarket brake controllers
- Does not interfere with trailer gain settings

Complete Installation Package

- Kit includes major components needed for full installation

Dealer Talking Points

- Added safety sells confidence
- Strong upgrade option for towing customers
- Easy integration with modern trailer systems
- Broad fitment across many trailer applications
